**Oznaczenie wyników badań mieszalności:**

- można mieszać bezpiecznie w zalecanych stężeniach
- nie zaleca się mieszania nawozów
- utrudnione mieszanie np. przy twardej wodzie i wysokim pH – szczególnie w takim przypadku wskazane jest zastosowanie preparatu PROAQUA® TRIO, który poprawia właściwości fizykochemiczne wody.
- można mieszać bezpiecznie w zalecanych stężenia po zastosowaniu PROAQUA® TRIO
